After marking each Maths test, find where the test score meets the upwards arrow of the corresponding test, and draw a cross.

You can find out what estimated percentage of candidates would achieve a lower score by reading off the percentile values to the right for each test.

To better spot the trend of how your child is progressing in terms of test scores and percentiles, connect successive crosses with straight lines.

	Test 1	Test 2	Test 3	Test 4	Test 5	Test 6	Test 7	Test 8	Test 9	Test 10	Test 11	Test 12	Test 13	Test 14	Test 15
