After marking each Maths test, find where the test score meets the upwards arrow of the corresponding test, and draw a cross.

You can find out what estimated percentage of candidates would achieve a lower score by reading off the percentile values to the right for each test.

To better spot the trend of how your child is progressing in terms of test scores and percentiles, connect successive crosses with straight lines.

	Test 31	Test 32	Test 33	Test 34	Test 35	Test 36	Test 37	Test 38	Test 39	Test 40	Test 41	Test 42	Test 43	Test 44	Test 45
