Secondary Entrance

Progress Chart

Maths - Book 4

www.secondaryentrance.co.uk

After marking each
Maths test, find
where the test
score meets the
upwards arrow of the
corresponding test, and
draw a cross.

You can find out what estimated percentage of candidates would achieve a lower score by reading off the percentile values to the right for each test.

To better spot the trend of how your child is progressing in terms of test scores and percentiles, connect successive crosses with straight lines.
